Ingersoll Rand Appoints Amar Kaul as Vice-President and General Manager for its Industrial Technologies Business in India

New Delhi, May 17, 2011: Ingersoll Rand, a world leader in creating and sustaining safe, comfortable and efficient environments, has appointed **Amar Kaul** as the **Vice-President and General Manager** for its **Industrial Technologies business in India**. In his current role, Amar will provide strategic leadership for all aspects of the Industrial Technologies business, which include growth through innovation and focus on emerging markets, operational excellence and building organizational capability in alignment with the company's long range objectives.

Amar joins Ingersoll Rand from Bharat Forge Ltd. where he was the senior vice president in his last position. He has over 18 years of rich and varied experience across engineering, automobile and non-automobile sectors. Amar holds a bachelor's degree in mechanical engineering from G.B Pant University and M.S in engineering business management from University of Warwick, U.K. In his new role at Ingersoll Rand, Amar's challenges would include building leadership capability within ITS India, focus on quality, delivery & services, achieving operating margin and improved employee engagements.

Commenting on the appointment **Venkatesh Valluri, chairman and president, Ingersoll Rand India** said, "India is a strategic growth market for Ingersoll Rand. The Industrial Technologies business will play a crucial role during this period of growth for the organization. India is also fast emerging as a hub for innovation and product localization for emerging economies with a focus on providing energy-efficient and sustainable solutions. Amar takes on the mandate of providing strategic leadership including growth through innovation to complement our focus on emerging markets as well as driving the strategic direction of the Industrial Technologies business in India."

Ingersoll Rand's Industrial Technologies sector provides products, services and solutions that enhance customers' energy efficiency, productivity and operations. The diverse and innovative products range from complete compressed air systems, tools and pumps to material and fluid handling systems. Industrial Technologies also enhances productivity through solutions created by Club Car®, the global leader in golf and utility vehicles for businesses and individuals.
