**Ingersoll Rand forays into Uttar Pradesh with Evolution™ Brand
of Contact Cooled Rotary Screw Air Compressor**
Ingersoll Rand expands its channel to cover central and east market in UP

Kanpur, Uttar Pradesh, August 22, 2014 – Ingersoll Rand, a global leader in compressed air technology, today announced its foray into the Uttar Pradesh market with the launch of **Evolution™**, its new brand of contact cooled rotary screw air compressor. With this commencement, Ingersoll Rand has appointed its first distributor in Kanpur to cover central and east UP region, thus expanding its channel footprint in the state.

The new “made in India” Evolution™ brand has been designed specifically to meet industry requirements while delivering energy efficient performance. With the Evolution™ range of air compressors, Ingersoll Rand will be covering all Small and Medium Enterprises (SMEs) and focusing on all key sectors in the state. Presently, the Evolution™ brand is established across 25 cities across India and has a strong presence of sales and aftermarket response teams to cater to needs of customers.

Speaking at the launch, Amar Kaul, Country Vice President, Compressed Air System and Services, Ingersoll Rand India Limited said “Kanpur is one of the major Industrial towns in the country. With this foray, we plan to cater to the needs of local customers through product specialization which is a big focus area for us. Evolution™ is a brand developed for the India market and by our India team at our plant in Naroda.”

“The Evolution™ business directly supports our strategy to grow in emerging markets. Our air compressors have been designed ground up for tropical Indian

conditions and will ensure the best level of performance and reliability that customers come to expect of Ingersoll Rand”, he added.

Evolution™ offers a wide network of certified and well trained technicians and engineers capable of supporting customers with cost effective service solutions that will help keep their compressed air system at peak performance.

The Evolution range of compressors are designed with the latest technology providing prominent benefits including:

- More CFM/kW - provides more air flow (CFM) with less power consumption (kW)
- Low Maintenance Cost - helps reduce maintenance cost and increases the life of the compressor.
- Long life Ultra-coolant - increases productivity and efficiency of air end. It has a long life of 8000 hours
- Three Stage Separation System - provides clean air with almost nil oil content to ensure high quality finish
- Efficient cooling at 46°C - provide more surface area for cooling and avoid nuisance tripping
- Control at fingertips - provides real time access to package discharge pressure, air end discharge temperature, fault shutdowns and diagnostic display etc.
- One stop solution – Refrigerant air dryer, air filter and receiver - provides moisture free air to enhance the life of end equipments. (Taken from the Evolution launch release)
