Ingersoll Rand Launches Air Operated ARO™ Dose Pumps in India

New Delhi, India, 29 August 2013 - Ingersoll Rand, a world leader in creating and sustaining safe, comfortable and efficient environments, announced the launch of its new ARO® air operated diaphragm dose pumps. The new product line expands Ingersoll Rand's existing ARO™ positive displacement pump portfolio that includes peristaltic hose pumps and piston pumps enabling high level of reliability, efficiency and productivity. The new PD01 series 1/4" pump is designed for dosing applications in the commercial laundry, car wash, wastewater treatment, paint, inks and packaging markets, and many other applications where accurate and repeatable dosing is integral to the process being performed.

The new 1/4" series pump comes with a solenoid-actuated valve option to electronically control the volume of fluid dispensed which allows the 1/4" diaphragm pump to operate with accuracy. Designed for clog-free operation, the 1/4" pump allows solids up to 1/16" in diameter to pass through the pump. This feature meets or exceeds competitive dosing pump capacities and offers suction lift capabilities of up to 31.7 feet and 15 feet of dry lift. The pumps are available in a variety of nonmetallic materials, including groundable acetal, kynar, and polypropylene with santoprene, hytrel, nitrile and PTFE elastomer options.

Neeraj Naik, Product Manager, ARO Diaphragm Pumps –Ingersoll Rand (India) Limited said, "We have always made efforts to bring innovation to the industry with our new product lines. The ARO Dose pump has been built with superior technology that offers flexibility to our customers in terms of placing orders based on the liquids being pumped, providing a cost-effective solution for their application. The 1/4" diaphragm pumps offer with the Flex-Check option enabling 360-degree mounting, making them ideal for tight space applications." ."

For over eighty years, the ARO fluid products business of Ingersoll Rand has developed partnerships with original equipment manufacturers and distributors, enabling the company to better focus on the unique pumping needs of many industries. It is a strategic merger of

application expertise, along with the company's decades old legacy of designing and building outstanding positive displacement pumps.

About Ingersoll Rand in India

Ingersoll Rand (NYSE:IR) advances the quality of life by creating and sustaining safe, comfortable and efficient environments. Our people and our family of brands — including Club Car®, Ingersoll Rand®, Schlage®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, secure homes and commercial properties, and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material and fluid handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. Ingersoll Rand is a \$14 billion global business committed to a world of sustainable progress and enduring results within our company and for our customers.
