ThermoKing® launches “ThermoTrack™” a Reefer Telematics Solution for real time monitoring of Truck, Refrigeration unit data and remotely control the Refrigeration unit at Cold Chain show 2016.

New solutions with advanced features offer real time position of truck, refrigeration unit performance and supports remote control of unit

Mumbai, India, October 17, 2016 – [Thermo King](#), a manufacturer of transport temperature control systems for a variety of mobile applications and a brand of [Ingersoll Rand](#), announced the launch of **ThermoTrack™ Reefer Telematics Solution** at the India Cold Chain Show on 17th-19th October, 2016 in Mumbai. Thermo King's ThermoTrack™ Solution designed for the truck refrigeration unit market will cater to customer needs by driving energy and operational efficiency provided through vehicle and temperature management & remote control feature. Ingersoll Rand will also display T Series, V Series, Ce Series and Cold Cube product range also at the exhibition.

Shipping fresh foods around the world to arrive in excellent condition requires constant monitoring of the cold chain to protect cargo integrity and Thermo King has pioneered it for its customer.

“Thermo King, as a world leader in transport temperature control, brought in its global learning into this telematics solution designed to address the need of India cold chain logistics requirement. With this launch of ThermoTrack™ Reefer Telematics Solution, we will provide our customers, monitoring and management technology that can protect their cargo, fleets and reduce operating costs. Our customer will be able to increase their operational efficiency and reduce risk of cargo loss due to inconsistent temperature profile by using this unique reefer telematics solution with Thermo King reefer unit. Unique feature of this solution allows customer to dynamically interact with installed Thermo King reefer unit and remotely monitor its temperature performance,” said Sudarshan Ananth, Region Vice President and Territory Leader – HVAC & Transport, Emerging Markets and India, Ingersoll Rand.

Key features of ThermoTrack™ Telematics System**Vehicle Management**

- Locate & Manage fleet on map
- Find nearest Thermo King dealers
- Use Geo-Fence entries and exits to manage on-time departures and arrivals.
- Manage Truck security with location.

Reefer Management:

- Improve response times with real-time notifications of reefer alarms.
- Increase unit uptime by managing service alerts.
- Proactively manage cargo temperatures and modes with two-way.
- Report generation on Reefer performance
- Preventive maintenance alerts

Temperature Management

- Monitor reefer set point and return air temperatures.
- Protect cargo and optimize reefer performance by remotely controlling the set point.
- Track unit performance and prevent breakdowns.

Thermo King currently operates 9 manufacturing facilities, 3 R&D centres of excellence and over 870+ dealers worldwide. Thermo King is committed to providing products that are ecologically responsible and high performers.

About Ingersoll Rand

[Ingersoll Rand](http://www.ingersollrand.com) (NYSE:IR) advances the quality of life by creating comfortable, sustainable and efficient environments. Our people and our family of brands—including [Club Car](http://www.clubcar.com)®, [Ingersoll Rand](http://www.ingersollrand.com)®, [Thermo King](http://www.thermoking.com)® and [Trane](http://www.trane.com)®—work together to enhance the quality and comfort of air in homes and buildings; transport and protect food and perishables; and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material and fluid handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. We are a global business committed to a world of sustainable progress and enduring results. For more information, visit www.ingersollrand.com or www.ingersollrandproducts.com.
