**Trane® launches all new series of premier air conditioning solution - HW3 for residential segment**

*New air conditioning units are designed and prepared for Premier Performance*

**New Delhi, X August, 2015** - [Trane](#), global leaders in Heating, Ventilation and Air Conditioning (HVAC) systems and a brand of [Ingersoll Rand](#), today announced the launch of its all new air conditioner series – HW3. The next generation air conditioner series from Trane optimize performance and enhance comfort, while providing energy savings, lower installed costs, reliable indoor air quality and overall superior system performance. The air conditioner series will be available in five variants in the price range of Rs.32, 000 onwards.

This highly efficient and sustainable solution features a reliable **gold condenser** along with best-in-class temperature reliability. The unit also offers innovative and expanded system controls like **self-clean mode** which cleans the dust formation on the coil and **My Zone** mode which enables you to maintain comfortable temperature around you by sensor analyzing the temperature in your zone until the desired temperature level is reached. This unit also offers Electronic Swing 4 way enabling airflow control at click of a button.

**Sudarshan Ananth, Territory Vice President and Business Head – HVAC & Transport, Emerging Market and India Business Unit, Ingersoll Rand** said, “We at Ingersoll Rand are focused on building products to improve lives with innovative and efficient solutions. Today, customers are looking for comfort centric systems and solutions that are energy efficient, reliable, easy to maintain and with modern designs that match their lifestyle. Our new launch of **HW 3 series** is in keeping with these needs of our customers.”

The new range is designed with following feature offers higher efficiency than conventional units, raising the bar for efficiency, sustainability and reliability:

- **All-copper Components**

Guarantees long life of your AC. The Trane AC uses high reliability Copper Tube Condenser, Evaporator & Interconnecting Pipes for longer life & better performance

- **52 Deg. Tested Machines**

## News Release

Energy-efficient, recognized brand compressor, which uses a Permanent Magnet (PM) motor offering greater operating range & efficiency.

- **Gold Condenser**

To give extra-long life, the outdoor condenser coil undergoes a special protective treatment called golden Fin. Golden Fin provides greater resistance to damage from salt and atmospheric corrosion. Golden Fin will last much longer than conventional or untreated systems under any similar conditions.

- **Self-Clean**

Self-clean can be started by one press of CLEAN button & it will remove the dust accumulated quickly through condensate water giving you better airflow & long life.

- **My Zone**

Unique function of Follow Me which when set enables you to maintain comfortable temperature around you. A sensor keeps analyzing the temperature in your zone until the desired temperature level is reached.

- **Electronic Swing 4 way**

Don't have to move every time to adjust the airflow direction, with a click of button you can have airflow where you need.

- **R410 (Green Gas)**

Green environment - friendly and efficient refrigerant
