

## Trane Rental Services Provides Temporary Power and Cooling during Equipment Breakdown or Planned Outage

**New Delhi, India, August 16, 2011** – Business operations can't stop just because equipment does. Trane, a leading global provider of indoor comfort systems and solutions and a brand of Ingersoll Rand, now offers Chiller Rental Services to help building owners and facility managers in India achieve optimal operating performance during a breakdown or planned outage.

Chiller Rental Services addresses cooling issues during equipment change-outs or planned maintenance. Examples include the following:

- **Increased capacity:** Occasionally, special circumstances may demand power and/or cooling beyond the capacity of existing systems. Trane rental equipment can supplement infrastructure during these periods of extraordinary demand.
- **Special events and on-site services:** Trane provides temporary chillers, power generators and on-site services for events such as corporate sponsor tents, sports competitions, concerts, trade shows, outdoor festivals, and many more. Trane also provides temporary equipment rentals for specific markets including schools, commercial buildings, factories, warehouses and healthcare facilities.
- **Planned outages:** When it is necessary to shut down heating, ventilation and air conditioning (HVAC) systems in order to conduct planned maintenance or make major improvements or renovations, there's no reason for other processes to shut down or for a building's occupants to be without cooling. With rented equipment from Trane, an outage can proceed smoothly, while business remains productive and employees and/or tenants enjoy a comfortable working environment.
- **Emergencies:** Free consultation services from Trane help manage the risk associated with outages due to natural disasters or events that cannot be controlled. These services can also help prepare for emergencies by creating a contingency plan ahead of time.

"When you need solutions, you need them quickly, but purchasing equipment for short-term use isn't always feasible," said **Rajesh Sikka, business leader for the Trane commercial business in India.** "Trane Rental Services provides a turnkey, no-hassle solution for temporary HVAC. Every piece of our HVAC rental equipment is a reliable, well-maintained Trane solution and is backed by the same strong service network that supports our permanently installed systems."

Trane Chiller Rental Services complements the existing line of Trane services that enables customers to improve reliability, efficiency and cost of ownership.
