

## Trane Launches all new advanced Fifth Generation Genyue<sup>5+</sup> Full DC Inverter VRF System

- *The new series provides 26% better efficiency (exceeds ASHRAE 90.1-2016 std for VRF heat Pump) compared to conventional system*
- *More compact and saves up to 30% installation space*
- *Easy control with its advanced 15" Touch screen controller - GEN Network Control*

**New Delhi, 13-12-2018:** Trane, a global leader in heating, ventilation and air conditioning (HVAC) systems and a brand of Ingersoll Rand, today announced the launch of Genyue<sup>5+</sup>, full DC Inverter VRF system for India and SAARC Markets. The advanced 5<sup>th</sup> generation inverter is an ideal choice across sectors such as retail, healthcare, hospitality, commercial, educational institutions etc.

With the launch of all new Genyue<sup>5+</sup>, the company has expanded its Commercial Unitary portfolio to not only effectively address the growing needs of our customers but to also focus on furthering energy efficiency and savings as envisaged in the Government of India's National Cooling Action Plan.

"Genyue<sup>5+</sup> has been designed keeping in mind our customer need for better efficiency in their operations and lower energy consumption while improving capacity, ensuring reliability and delivering ease of operations. The advanced system will provide 26% better efficiency with its compact design saving upto 30% more space in the customer premises." said **Sanjeev Seth, Country Leader, HVAC & Transport, India & SAARC Markets, Ingersoll Rand.** "We are committed to introducing pioneering technology and products that enhance customer experience and help our customers achieve their sustainability goals in the long run."

The all new inverter system has been designed to provide best-in-class efficiency, high reliability, convenient operations and enhanced comfort. It also boosts significant performance and energy savings through precise temperature control for a stable and comfortable environment. The advanced DC technology helps make the compressor run more smoothly with lesser noise and more efficiency. It also has wide operating range that is applicable for different regions with different climates. The performance of the series is upgraded substantially to improve the system's self-adaptive adjusting capacity. The product has been tested rigorously to stringent quality standards to ensure a safe, comfortable and efficient HVAC system.

Genyue5+ is easy to control with its GEN Network Control, the advanced 15" Touch screen controller that is suitable for energy management and third-party building management system.

**Key Enhancements in Genyue<sup>5+</sup> Series:**

- The new Genyue<sup>5+</sup> series is better in efficiency with distinct class leading IPLV (cooling) up to 8.7\* up by 26% from conventional Inverter system
- The new series will have modules of Out Door Unit (ODU) modules of 8~ 22 HP and combination extended upto 88 HP
- The new series is tested at high ambient, and features a small footprint

**About Trane:**

Trane is a world leader in air conditioning systems, services and solutions. Trane helps customers succeed by providing innovative solutions that optimize indoor environments through a broad portfolio of energy-efficient heating, ventilating and air conditioning systems, building, contracting and energy services, parts support and advanced controls for homes and commercial buildings. Trane serves engineers, contractors and building owners on all continents and in an array of markets including education, healthcare, government, industrial/manufacturing, data centers, lodging, retail and commercial real estate.

**About Ingersoll Rand:**

Ingersoll Rand (NYSE:IR) advances the quality of life by creating comfortable, sustainable and efficient environments. Our people and our family of brands—including Club Car®, Ingersoll Rand®, Thermo King® and Trane®—work together to enhance the quality and comfort of air in homes and buildings; transport and protect food and perishables; and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material and fluid handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. We are a global business committed to a world of sustainable progress and enduring results. For more information, visit [www.ingersollrand.com](http://www.ingersollrand.com) or [www.ingersollrandproducts.com](http://www.ingersollrandproducts.com).

**About Ingersoll Rand India:**

Ingersoll Rand is committed to India and is implementing strategies for product innovation and design for Industrial Technologies; Food Safety; Energy Efficiency and Sustainability. The company is based out of 21 locations in the country. Ingersoll Rand believes that Innovation for emerging economies is critical for products to succeed in these markets. The company has two world class manufacturing facilities at Naroda and Sahibabad; and Engineering and Technology Centers at Bangalore and Chennai. Ingersoll–Rand (India)
